
**QUESTIONNAIRE FOR EVALUATION OF
HIGH PERFORMANCE BITUMINOUS PREMIX**
(General Rewrite)

1. Producer: Contract No.:
2. Date Received: Location:
3. Condition of material at time of delivery:
 - A. Quantity Received:
 - B. Did material contain ice crystals or water? Y N
 1. If so, how much? (Circle number 1-5 below.)

Insignificant Amount - 1 2 3 4 5 - Highly Significant Amount
 - C. Was material contaminated? Y N
 1. If so, with what?
 - A. Dust
 - B. Limestone
 - C. Sand
 - D. Other (Specify):
 - E. Unknown (Describe):
 - D. Did material contain lumps? Y N
 1. If so, how much? (Circle number 1-5 below.)

Insignificant Amount - 1 2 3 4 5 - Highly Significant Amount
 - E. Was material fully coated with a shiny black appearance? Y N
 1. If not, describe condition.
4. Storage of Material
 - A. How was material stockpiled?
 - B. Was stockpile kept covered? Y N
 1. If yes, how?

C.	Did a hard crust form on the stockpile?	Y	N
1.	If yes, how thick was the crust?		
D.	Did material change appearance? (For example, change from shiny black to dull brown?)	Y	N
1.	If yes, describe change in appearance.		
E.	For how long was material in stockpile before use?		

5. Performance of Material

A.	Was material usable in cold weather?	Y	N		
1.	Approximately, in what temperature range was it used?				
B.	Did material stick in patch area?	Y	N		
1.	Was patch area wet or dry?				
C.	Did material stay put under traffic?	Y	N		
1.	If not, did material:				
A.	Track bituminous oil				
B.	Crumble and scatter				
C.	"Pop out" of patch in large chunks				
D.	Deform or move				
D.	Was material heated or warmed prior to use?	Y	N		
1.	If yes, how?				
E.	Overall performance rating (Circle number 1-5 below.)				
	Very Poor	Poor	Average	Good	Excellent
	1	2	3	4	5
F.	Comments
